

Motion detector

IS 345 MX Highbay

EAN 4007841010492

Functional description

High-bay warehouses often have narrow aisles and high ceilings. Too high for most sensors. We have just the right solution: the IS 345 MX Highbay infrared motion detector was specially developed for mounting at heights of up to 14 m and for precision detection between narrow aisles. Perched up there, it gives you surveillance quality at the highest level, literally. So in the future, you can confidently set your sights higher when it comes to sensor systems! Now also available for concealed installation.

Technical specifications

Model	Movement sensor
Sensor type	Passive infrared
Reach, radial	30 x 4 m
Recommended installation height	4-14 m
Dimensions(w x h x d):	65 x 95 x 95 mm
Voltage	220 - 240 V, 50/60 Hz
Output	max. 2000 W, max. 8 fluorescent lamps / LED lamps C < 176 µF
Teach-function for response value luminosity	Yes
Time setting	5 sec. - 15 min. Pulse mode (approx. 2 sec.)
Degree of protection (IP)	IP54
Temperature	-20-50 °C
Housing	UV-resistant plastic
Model	COM1
Version	COM1 – Surface-mounted, square
