

VENTS TT Pro Series

ESC CODE:

- **VTT100** 100mm
- **VTT125** 125mm
- VTTPRO150 150mm
- VTTPRO200 200mm
- VTTPRO250 250mm
- VTTPRO315 315mm

Inline mixed-flow fans with the capacity up to 2050 m³hr.

This fan is also available in a pack, refer to page 33.

Applications

- · High performance mixed flow fans.
- For supply and exhaust ventilation of premises requiring high pressure, powerful air flow and low noise level.
- Ventilation of bathrooms and kitchens and other humid premises as well as flats, cottages, shops, cafés etc.
- Compatible with round air ducts from 100mm to 315mm.

Vents TT fans are covered with 2 year warranty.

Design

- · Modern design and aesthetic look.
- The casing and the impeller are made of high quality durable low-flammable polypropylene.
- · Protection rating IPX4.
- Fan maintenance is fast and easy due to the removable central block from the casing, which includes the impeller and motor block (see image below).

Motor

- Single-phased double-speed motors with low energy demand.
- Designed for continuous operation.
- Equipped with thermal overheating protection.
- The ball bearings extend the motor service life up to 40,000 hours at non-stop operation.
- The inlet spigot is equipped with a collector to enable smooth air inlet to the fan. The hemispheric impeller shape and

specially profiled blades increase the air flow circular velocity and provide higher pressure and capacity as compared to standard axial fans.

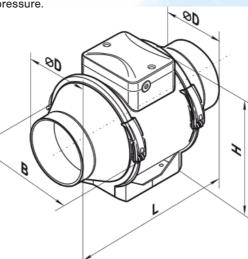

• The diffuser, the specially profiled impeller and the directing vanes at outlet from the fan casing distribute air flow in such a way as to attain the best combination of high performance, enhanced pressure and low noise.

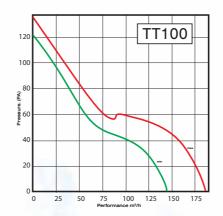

Control

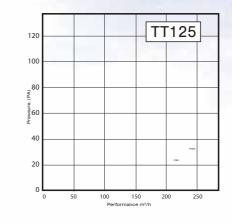

• The double-speed motors are controlled with a built-in switch.

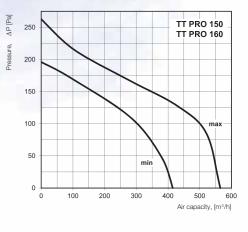

Mounting Features

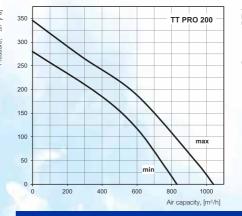

- The fans are suitable for mounting at any angle and any point of the system.
- Several fans may be installed inside one system e.g.
- · Parallel mounting to increase air flow.
- Series mounting to increase operating pressure.
